## Summary

An entry-level MERN Full Stack Developer with a strong foundation in modern web technologies and a track record of building interactive web applications from the ground up. Eager to apply my technical skills and start my career in a dynamic team environment.

## Projects

### ESSENCE - An Ecommerce Clothing Web Application

<https://essenceclothingapp.netlify.app/>

01/2024

Tech Stack: Node Js | Express Js | REST API | MongoDB | Mongoose | React | Redux

- Developed a dynamic e-commerce web application and successfully managed to integrate multiple portals (user, seller, admin) within a single platform.
- Utilized Node.js and Express.js for backend development, MongoDB for database management, and integrated RESTful APIs for seamless data exchange between the server and client-side.
- Enhanced platform usability and efficiency by designing interactive and user-friendly interfaces across all portals, ensuring a seamless and intuitive experience for users, sellers, and administrators.

### CryptoApp with Realtime Data Integration using Rapid API

<https://my-cryptocurrencyapp.netlify.app/>

02/2024

Tech Stack: React | Redux | Rapid API | Ant Design | Chart.js

- Developed "CryptoApp", a web application providing real-time cryptocurrency data, utilizing Redux for state management and Rapid API for live data integration.
- Implemented a user-friendly interface with Ant Design and integrated Chart.js for dynamic, interactive data visualization, enhancing user engagement and experience.

### Personal Portfolio

<https://loganathan-g-portfolio.netlify.app/>

11/2023

Tech Stack: React

- Developed a dynamic and responsive personal portfolio website leveraging React.js, showcasing a modern UI/UX design that highlights my projects and skills through interactive components and seamless navigation.

## Skills
